

MIPS I

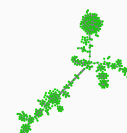

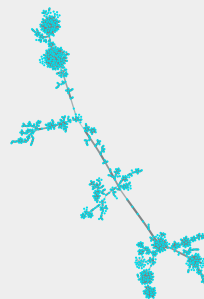

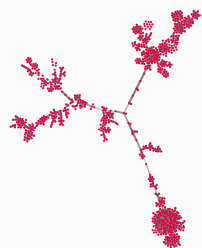

SuperH

Motorola 68k

ARM 32-bit

SPARC

PowerPC

*amnesia*

- CCTV exploit
- VM detection
- VM wipe
- root/user persistence

*"weebsquad"*

- initial version similar to *kaiten*
- high code reuse after
- *SSH scanner*
- *Telnet scanner*

*capsaicin*

- frequent updates
- new flooders
- upgrade itself using local *gcc*
- Mirai IP generator

*zbot*

- initially *kaiten*-like
- then reuse flooders

*uzi*

- "uzi" Telnet scanner
- new CnC commands

*kaiten*

- supposedly used to name the family *Tsunami*

*kstd*

- very basic
- only a couple of flooders
